Data Scientist, Analyst

EXPERIENCE

Wowso Inc. ▪ Remote ▪ USA ▪ May 2022 - Present

Data Scientist

Project:

Wowso inc. is a social networking platform that uses AI to curate trending content from social media and then presents it in a categorized & customized news feed.

- Built a back-end system to automate extracting and storing data from Twitter using APIs.
- Applied data science techniques to manipulate large structured and unstructured data sets.
- Developed a ranking system and real-time categorization of users and tweets.
- Applied NLP methods, sentiment analysis, and ML models to these datasets.
- I successfully completed a good infrastructure for the Wowso app and deployed the sample system for the developers.
- Translated quantitative analyses and findings into accessible visuals for non-technical audiences
- Used Python, Tweepy API, MySQL, S3, Lambda Function, and RDS in AWS.
- Managed the project from beginning to end.

BusyQA ▪ Remote ▪ Canada ▪ May 2020 - June 2021

Software QA Analyst /Tester

Project #1:

Jombone Inc.(v3.0) is a fully digital cloud-based Hiring & Employment Management platform for Workers and Companies.

- Flagged bugs and defects and relaying issues to the Scrum Master through Jira.
- Validated that user expectations are achieved during the testing process.
- Designed, developed, executed, and evaluated automated tests for functional, regression, and performance testing.

Project #2:

TwoPLUGS (v10.0) is a marketplace where users sell services they are good at, earn some points, and use them to buy a service they need ALL without using money.

- Wrote test plans, test cases, and test scripts from scratch.
- Performed REST API testing by validating HTTP requests and responses using Postman.

Teledyne DALSA ▪ Waterloo, Canada ▪ March 2018 - January 2020

Technical Specialist – Quality Control/Testing

- Programmed X-Ray detectors and updating the software of the printed circuit board (PCB) using National Instrument Software and conducted a Cold Spray temperature test before installing it into the detector.
- Assembled and tested X-Ray detectors for different types of tests such as functional and optical tests.

TECHNICAL SKILLS

Languages: Python, SQL, MySQL, PostgreSQL, Java, JSON

Machine Learning: Data Mining, Clustering & Classification, Data Analytics, Quantitative Analysis, Data Visualization, Predictive Analysis, Statistical Modeling, AB testing, Relational database

Packages: Scikit-learn, PySpark, Git, NumPy/SciPy, Pandas, Jupyter, Power BI, Tableau, Matplotlib, Excel, PowerPoint, and Word

EDUCATION & RECENT TRAINING

Machine Learning Full Stack Bootcamp, Magnimind Academy | USA, CA

Master of Science (MSc), Mechatronics Engineering | University of Waterloo | Canada, ON
